We Change the Game

The traditional program implementation methods may have ruled projects for decades, but there is now an innovative project implementation model.

At PRITNA, we bring your business or foundation out of the old and into the new with our groundbreaking methods and solutions.

We are committed to transforming processes through innovative products.

Data Migration with SWAN

SWAN is ideal for Social program enterprise applications and mission-critical data migration projects.

SWAN combines data migration with enterprise class functionality such as version control, change data management, and parallel scalability.

Automation Testing using SwanTester

SwanTester is the simple way to minimize or eliminate manual testing.

SwanTester is a specialized testing tool made for social program applications embedded on Selenium frameworks. With both traditional and advanced functionalities, SwanTester is compatible with all systems.

Our Products

SWAN

Data migration should be fast, error-free, and efficient.

Our Swan Data migration tool allows you to effectively migrate all data from your old system to the new without data corruption or loss

SwanTester

SwanTester is the future of functional and regression testing.

Our automated software seamlessly links with SWAN to deliver automated testing capabilities for functional, regression, GUI, and data-driven testing.

Intelligent Data Manager

Data Manager is a flexible and yet advanced data management tool that has the pre-built capabilities to understand business flows and screen navigations.

Services

What is our approach?

When working with each client, our team creates a structured approach to designing and planning business transformation that will ensure your projects are successful and your objectives are achieved.

“Experience is paramount- learn how PRITNA can implement your project with ease.”

What we offer?

We offer expert consulting and support for a vast variety of data migration services for Social Program Management Project.

We help ensure your data is clean and complete with automated testing and review. Easily implement application quality management using our automated processes for tests, and business components.

- We provide tools to solve complex business process in social program management projects.
- PRITNA will take responsibility of the project delivery.
- Our research team will continue to support our project team onsite

We help you design and achieve market-leading performance roadmaps by combining creative thinking, technology expertise, and global reach.

We work closely with System Integrators to reduce project cost and time through the use of our innovative tools.

We Save Your Time

Let us help you optimize project process.

We understand that with such complex projects and processes, proper support is just as important as having the right tools.

Our team specializes in assisting companies with customizations, deployment and support of Social Program Management platforms.
